

PHO SOPHORS

Full Stack Developer

Profile

Full-Stack Developer with 2 years of experience building modern web applications using Next.js, React, TypeScript, Node.js, and Express.js. Experienced in developing scalable frontend interfaces, backend APIs, and microservices across multiple business domains. Passionate about writing clean, maintainable code, optimizing application performance, and delivering reliable solutions that create business value.

Work Experience

Full-Stack Developer – TovTrip (Tour & Travel Platform)

Jan 2026 - Present

- Develop frontend and backend features across multiple platform services, including hotel, rental, tour, spa, user, payout, and booking systems.
- Build and maintain RESTful APIs, microservices, and database integrations using Node.js, Express.js, Knex, Drizzle ORM, and MariaDB.
- Develop and maintain mobile APIs, shared backend services, including cron jobs, email templates, notification services, background job processing, and real-time features.
- Build and enhance admin and merchant dashboards using Next.js, React, TypeScript, and React Server Components.
- Contribute to code reviews, debugging, and continuous improvements to ensure scalable, maintainable, and high-quality software.

Junior Web Developer – TovTrip (Tour & Travel Platform)

Sep 2024 - Jan 2026

- Developed responsive and reusable web applications using React.js, Next.js, TypeScript, Tailwind CSS, and React Server Components.
- Built and enhanced admin and merchant dashboards while integrating RESTful APIs using React Server Components, Server Actions, TanStack Query, SWR, Jotai, and reusable custom hooks.
- Migrated legacy React.js applications to Next.js with TypeScript, improving performance, code quality, scalability, and developer experience.

Personal Project - Microservices E-Commerce API

Jan 2026 - Feb 2026

- Developed a microservices-based e-commerce backend with product, order, payment, and user services using Node.js, TypeScript, Knex, Drizzle ORM, and MariaDB.
- Built RESTful APIs, service-to-service communication, and shared backend modules for a scalable, maintainable architecture.
